

1. Please share with us your thoughts on the course:

Please comment on the lab or discussion leader's strengths and areas for possible improvement.

- "This instructor was nice and would explain everything until you understood which was appreciated. Some improvement would be to talk less about papers and how to write papers and 100% more review on what lecture was about." -- [REDACTED]
- "You have the best communication with your students. In person, online. I really enjoy how involved you are with the class and you seem to be pretty knowledgeable with politics." -- [REDACTED]
- "Thibaud taught me many useful skills that I wish I had known about earlier on in my college career. His leadership and drive was a very good example to me. He is an extraordinary person and one of the best GTF's I have had at the University of Oregon. You can truly tell that he cares for all of the students and wants each and everyone of them to succeed.

One suggestion I have for discussion would be to arrange the desks in a circle so that everyone is facing each other. This has been helpful for me in past discussion courses." -- [REDACTED]
- "Thibaud was a great GTF, he engaged students about the readings and was not afraid to share his opinions. He was open to students who disagreed but wasn't afraid to challenge students." -- [REDACTED]
- "Very Great and Helpful GTF. Really helped me understand the concepts and write a good term paper. Will Make a great Teacher someday." -- [REDACTED]

Please comment on the strengths and areas of possible improvement for the lab or discussion as a whole.

- "This discussion class was helpful when the topics in class were reviewed. When we were told about papers I found myself and lots of others mentally checking out. We are in college we should know how to write papers by now. More discussion on class topics to help us better understand would have been very helpful and appreciated." -- [REDACTED]
- "You should suggest to Kaufman, how to set up slides. Or present a main point.

For you tho, maybe during the last 10 minutes of class you can have a question and the students can have a heated debate over it." -- [REDACTED]
- "As a whole this course was very well structured and helped to reinforce the ideas and takeaways from class. Thibaud utilized technology as a tool to help get the students to participate and collaborate.

My suggestion for improvements is that I personally don't work well within small groups. This however could be helpful for other students. I just prefer to work with the group as a whole or with a partner." -- [REDACTED]
- "This discussion was good to talk about the readings, but that often did not happen because people did not read or did not want to talk about it. The last session of discussion was the best because we were able to work in groups. I wish we would have either focused just on the paper or just on the readings because it was a bit difficult trying to do both in such a short session." -- [REDACTED]
